

Patrick M. Flaharty, M.D.

"Azul offers a variety of customized rejuvenation techniques to restore your youthful appearance."

Patrick M. Flaharty, M.D., medical director of Azul Cosmetic Surgery and Medical Spa, specializes in facial cosmetic surgery and nonsurgical facial rejuvenation for people of all ages. Dr. Flaharty uses the latest techniques in his personalized approach to rejuvenate the face, forehead, eyebrows, eyelids and lower face and neck. He also offers nonsurgical services to erase wrinkles with fillers and lasers, as well as to reduce sunspots, rosacea and acne for a more youthful glow and appearance.

He is among the first 450 cosmetic surgeons trained in the Contour Threads face- and neck-lift technique for nonsurgical facial cosmetic enhancement to reposition sagging brows, eyes, cheeks, jowls and neck. Contour Threads has brought a new era to facial cosmetic enhancement,

often delaying the patient's need for more invasive facial cosmetic surgery.

Azul Medical Spa, physician-directed by Dr. Flaharty, offers a wide range of advanced skin-care services and medical-grade skin-care products and make-up. Services include Palomar photo skin rejuvenation, laser hair removal and leg vein therapy, as well as therapeutic facials and massage therapy, all in a tranquil setting, attended by a highly trained staff dedicated to caring for your body, mind and spirit.

In practice in Southwest Florida since 1992, Dr. Flaharty is board-certified in ophthalmology with specialized training in oculoplastics and advanced training in facial cosmetic surgery.
